POP surfaces offer the design flexibility and price point you need when compared to laminate or melamine surfaces.

Our wood powdercoat technology provides a complete coating that is completely seamless and doesn't require edge banding, making it the perfect solution for hospitality, corporate, and health care.

ATTRIBUTE	POP	MELAMINE	HIGH PRESSURE LAMINATE
STAIN RESISTANCE	All reagents no effect	Reagent 1-10 no effect Reagent 11-15 slight effect	Reagent 1-10 no effect Reagent 11-15 slight effect
SCRATCH HARDNESS	Meets or exceeds Pass 3H & Pass 4H dependent on formulation	Meets or exceeds 400 cycles	Meets or exceeds 400 cycles
ABRASION RESISTANCE	60 mg loss	55 mg loss	52 mg loss
CROSSHATCH ADHESION	No loss of adhesion	Delamination	Delamination
EDGE PROFILE	Any	Limited to edge band requirements	Limited to edge band requirements
COLOR CAPABILITY	Any color on the spectrum	Limited to MFR coloring	Limited to MFR coloring
VOC'S RELEASED IN PRODUCTION	Zero	Adhesive off-gas measurement	Adhesive off-gas measurement
RECYCLABILITY	Yes - 100%	No	No - phenolic
CARBON FOOTPRINT	1.5	Much higher	Much higher

SUSTAINABILITY

We all can take part in our responsibility to change and we believe, change happens when we all collectively agree that the small acts made to toward our future are worth the investment. We believe that creating highly crafted timeless products that last is the most responsible approach. That's why we pay attention to the details and consider material yield, waste, and reclamation throughout our manufacturing and packaging.

And to ensure our employees and consumers are safe now and in the future, we are committed to sourcing regional materials, that are free from glues and toxins that will our affect our health and environment.

CLEANING AND SANITIZATION

We all have a responsibility to care for and protect the beauty of our world as well as our health and wellness. When selecting a cleaner, making the right choice for your business and protecting the health and safety of the community is more important than ever. With the onset of Covid-19 many new cleaning products entered the commercial market that are hazardous to our health, corrosive to your furniture and toxic for our water and wildlife.

In effort to protect the health and safety our clients, and the environment we've provided our recommended list of commercial cleaners and sanitizers that kill 99% of the bacteria, and are safe for you, our surfaces, and our planet. **Use of non recommended cleaners will void the warranty.**

HOW TO CLEAN POP TABLES

For normal cleaning, wash with a soft cloth and a mixture of a mild detergent and warm water; wipe dry with a clean, soft cloth.

Avoid the following types of cleaning agents: Lysol cleaners, abrasive cleaners (Soft Scrub[®], Comet, Etc.), acetone based cleaners, and quaternary cleaners (quaternary ammonium compounds), as these cleaners can weaken and damage your finish. Citrus type cleaners are also not recommended as they can leave behind oily films that are difficult to remove.

Never let cleaning or disinfecting products dry onto the furniture surface. This can weaken and damage the epoxy finish leading to scratching and discoloration.

For spot cleaning, spray Fantasik[®], 409[®], or Kleerdex Company's Kleer Off General Purpose Cleaners, and wipe until dry with a clean, soft cloth.

Spray recommended cleaning solution according to disinfectant's instructions. Wipe dry with clean, soft cloth.
